Let's Draw!

Let's look at some guitars. Practice drawing realistic and abstract versions of a guitar.

How can we make our drawings abstract?

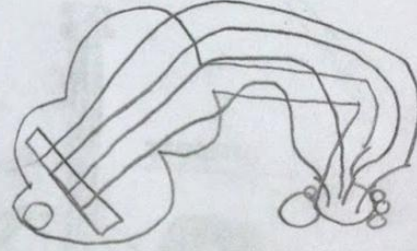

- **Distort:** Elongate parts and shorten others. Make the shapes different but keep the parts where they should be.
- **Simplify:** Make the shapes of the guitar simpler, less distinct. Use little or no detail.
- **Cubism:** Break up the parts of the guitar and put them back together in a different, abstract way. Think of it as if you were looking through broken glass.
